ELECTION OF SPECIES

1. Claims 1-19 are generic to a plurality of disclosed patentably distinct species comprising compounds for imaging. In particular, the compounds may be for formula I as set forth in claim 4 comprising the variables Q, d, Ln, Ch', x, MT, AL1, y, z, and AL2. The variables may have definitions ranging from a bond to a heterocyclic ring system (for examples of definitions, see pages 30-32). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Note: *The Examiner respectfully requests that the Applicant assign each variable the appropriate value when electing a species (i.e., X = hydrogen; Z = nitrogen; Y = -CH₃; etc.) and state which claims are drawn to the elected species.*

2. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. A telephone call was not made to request an oral election to the above restriction requirement due to the complexity of the restriction.

Art Unit: 1619

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
